European Vocational Skills Week.

During the week of the 20th of November, the European Vocational Skills week second edition will be organised. The aim of this event promoted by the European Union is to stimulate a positive perception of vocational education and training, in order, to increase attractiveness as well as the number of applications in vocational education and training. EASE believes it is important for the workforce in the sport to receive the appropriate education and competences. A better skilled and qualified workforce will lead to better coordination and cooperation in the sector. Consequently, EASE supports the EU in its belief that it is important to demonstrate the wide range of opportunities and the excellence and quality that vocational education and training can bring.

Activities and events presenting benefits of vocational education and training will take place before and during the European Vocational Skills week across all Member States. In Brussels there will be a press conferences, workshops, conference and a closing event with awards. Last year more than 900 activities were organised on national, regional and local level in EU Member States. In addition, some of the conferences in Brussels could be followed on livestream. The expectation is that the series of events will be even bigger than last year and hopefully more successful. So keep an eye out!
